Physical world intelligence, delivered in minutes.

Mosaic turns the people already near every store
into an on-demand intelligence network — powered by AI.

PRE-SEED | $500K SAFE · $5M CAP | UK CPG · 2025

01 — THE PROBLEM

Brands are blind to what's on their shelves.

24–48 hrs

Average time for a brand to learn about a shelf compliance issue using legacy audit services like BeMyEye and Premise.

$340

Revenue lost per store per day when products are out of stock, misplaced, or out of compliance — before the brand even knows.

60%

Of CPG audit tasks are completed too late to take corrective action. By the time data arrives, the window has closed.

The root cause: current solutions rely on scheduled field agents and manual dispatch — a 20-year-old model bolted onto modern data expectations.

02 — THE INSIGHT

There are already people near every store, all day long. They just need a reason to look.

Millions of people

pass within 200 metres of supermarkets and convenience stores every single day as part of their normal routine.

One photo. 30 seconds.

A collector opens Mosaic, photographs a shelf, and earns within the time it takes to grab a coffee. Zero route required.

Network effects

Every new collector densifies the network. Past a critical mass, tasks dispatch and complete in under 10 minutes — automatically.

03 — THE SOLUTION

Meet Mosaic. Intelligence that doesn't wait.

An AI-native platform that dispatches tasks to nearby collectors instantly, processes photos with Mosaic Vision in 30 seconds, and delivers compliance intelligence in under 10 minutes.

0s → 10 minutes vs 24–48 hours

01 — Task Dispatch
Brand triggers a compliance check. Mosaic instantly broadcasts to nearby collectors. **0 seconds.**

02 — Photo Capture
A collector already near the store accepts the task, photographs the shelf. **~8 minutes.**

03 — Mosaic Vision AI
Imagen 3 analyses the photo: stock levels, placement, price compliance, competitor presence. **30 seconds.**

04 — Intelligence Delivered
Structured, actionable data appears on the enterprise dashboard. **Under 10 minutes total.**

04 — HOW IT WORKS

Three tiers. One network.

DISPATCHED TASK	ACCEPTS COLLECTOR	SUBMITTED PHOTO	DELIVERED DATA
0s	~2 min	~8 min	8m 30s

COLLECTORS

£3–£15

Earn per completed task. People already near stores using their phone camera.

>

MOSAIC PLATFORM

AI Core

Dispatch engine, Mosaic Vision (Imagen 3), quality validation, structured data output.

>

ENTERPRISE

Dashboard

CPG brands see compliance data, heatmaps, competitor presence — in under 10 minutes.

05 — MARKET OPPORTUNITY

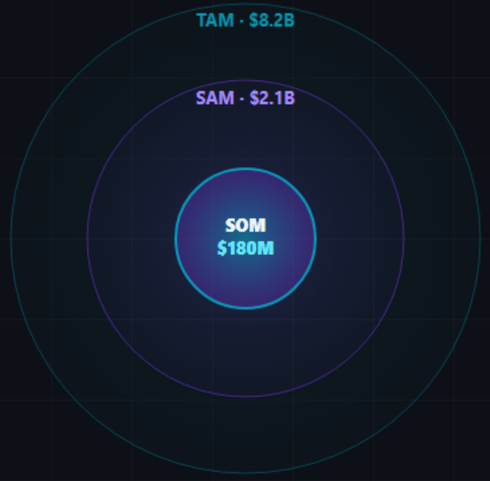
A large market at an inflection point.

Retail intelligence is a multi-billion dollar industry. AI makes it accessible to every CPG brand, not just the top 10.

TAM
$8.2B
Global retail intelligence market

SAM
$2.1B
CPG compliance · UK + EU

SOM
$180M
Top 500 UK CPG brands



06 — BUSINESS MODEL

Two revenue streams. One flywheel.

Enterprise SaaS

£2,500–£15K

per brand · per month · based on store coverage

- Unlimited compliance tasks within tier
- Real-time dashboard and API access
- Custom AI analysis rules per brand
- SLA: data delivered in <10 minutes

Collector Marketplace

20%

platform take on every collector payout

- Collectors earn £3–£15 per accepted task
- Payouts processed weekly via Stripe
- Bonus multipliers for high-density areas
- Reputation score drives priority dispatch

AVG CONTRACT	GROSS MARGIN	TARGET ARR Y2	CAC PAYBACK
£6,200	72%	£1.8M	<3 mo
/ month	at scale	20 brands	enterprise

07 — TRACTION

Early signal is strong.

3	47	94%	MVP
LOIS SIGNED	BETA COLLECTORS	PHOTO ACCEPTANCE	LIVE & TESTED

LETTERS OF INTENT — UK CPG BRANDS

MF **Meridian Foods**
UK natural food brand · 450 stores

NE **Nestlé UK (pilot)**
Confectionery compliance · nationwide

UL **Unilever (pilot)**
Health & beauty category · 200 stores

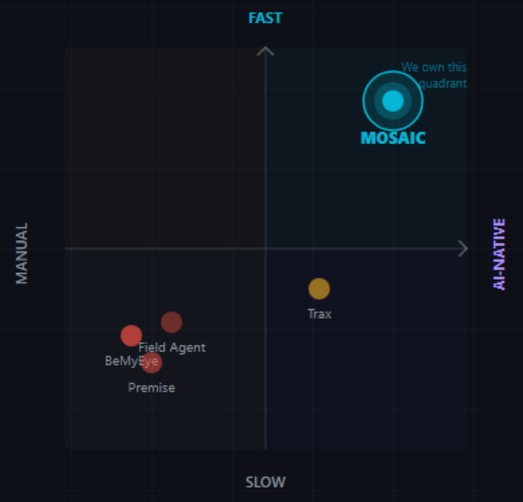
✓ 94% photo acceptance rate means our AI quality bar is working — bad photos are rejected, collectors learn fast.

08 — COMPETITION

Faster. Smarter. AI-native.

Existing players use scheduled auditors and manual analysis. They retrofitted AI. We built for AI from day one.

COMPANY	SPEED	AI-NATIVE	REAL-TIME	PRICE
Mosaic	✓ <10 min	✓	✓	Mid
BeMyEye	✗ 24–48h	✗	✗	High
Premise	✗ 24–72h	~	✗	High
Trax	~ Hours	~	~	Very High
Field Agent	✗ 12–24h	✗	✗	Mid



09 — WHY NOW

Three tailwinds. One window.

2024 INFLECTION

AI Vision at Production Quality

Google Imagen 3 and similar frontier models crossed the threshold for reliable shelf analysis in 2024. Photo-to-structured-data accuracy now exceeds 94% on CPG use cases. This wasn't possible 18 months ago.

STRUCTURAL SHIFT

Gig Economy Fully Normalized

Post-Uber, post-Deliveroo — earning via phone-based tasks is a mainstream behaviour. 34% of UK adults have done gig work. Onboarding a collector now takes under 3 minutes.

POST-COVID

Retail Intelligence Urgency

Supply chain chaos exposed how blind CPG brands are to physical shelf reality. Boards now mandate real-time visibility. Legacy audit contracts are up for renewal across the sector in 2025–26.

The window: AI vision models are commoditising the analysis layer. The moat will be the collector network density. First mover who builds that network wins — and switching costs become structural.

10 — TEAM

AI-native from day one.

CEO

Founder & CEO

PRODUCT · GTM · STRATEGY

Serial founder with deep CPG and retail intelligence background. Previously built and sold a B2B SaaS tool serving UK food & beverage brands. Operator-first, customer-obsessed.

CTO

Co-Founder & CTO

AI · PLATFORM · INFRASTRUCTURE

ML engineer with prior experience at a London computer vision startup. Architected Mosaic Vision using Imagen 3. Shipped the MVP solo in 6 weeks. Holds 2 patents in image processing.

- AI-native build speed — we ship in weeks, not quarters
- 18-month runway on $500K — default efficient
- Both founders are repeat builders — no first-time risk

11 — THE ASK

$500K to own the shelf.

18 months of runway to reach 20 enterprise brands, 500+ collectors, and Series A readiness — with unit economics that already work.
